SAFETY HELMETS, HARD HATS AND ACCESSORIES.  
DESIGNED & MADE IN AUSTRALIA

# ABOUT SSA

The home of TUFFGARD, the Australian safety helmet. The people behind Sureguard Safety Australia and this great safety product have many years experience in the Australian safety industry and are proud to have designed, manufactured and launched this Australian made and owned product.

Sureguard Safety is the only Australian made AND Australian owned manufacturer of hard hats in Australia. This Australian Owned business is based in Sydney. We manufacture a range of safety products and accessories being our own proprietary lines. We also manufacture custom and OEM branded product.

Sureguard is a business committed to quality products, and prompt reliable service.

Our company is continually moving forward with market demands introducing new innovative ideas and products.

# 100% AUSTRALIAN OWNED & MADE

It is with great pride that the Aussie Owned Hard Hat & Safety Helmet manufacturer Sureguard Safety Australia has been approved by the Australian Made Club to be an official licensee and to carry the Australian Made and Owned symbol.

Sureguard Safety Australia are now the only Australian manufacturer of safety hard hats that are 100% Australian Owned and Manufactured. Sureguard Safety can officially boast that all our products are 100% Australian owned and made. Something that our competitors can not claim.

# STANDARDS

## AS/NZS 1801:1997

### Occupational Protection Helmets

The objective of this standard is to specify protective helmets that are to be worn in a variety of occupations, in order to reduce the severity of head injury from hazards associated with such activities.

There are several methods of testing hard hat performance and safety criteria under the standard, including:

- Resistance to penetration as specified within AS/NZS 1801:1997
- Stiffness of the shell as specified within AS/NZS 1801:1997
- Electrical resistance as specified within AS/NZS 1801:1997

## AS/NZS 1800:1998

### Cleaning, Maintenance and Replacement of Hard Hats

Consult the manufacturer's information on proper care and maintenance, including which cleaning products and other materials may have a damaging effect on the hat. Clean the hard hat regularly with warm water and soap, allowing it to air dry. Inspect the shell, headband, suspension system and other accessories daily before use. These inspections should focus on finding cracks, tears, punctures, holes and any other damage. The headband mustn't be stretched or worn out and the hat should always fit well and comfortably.

Store the hard hat in a safe environment that is away from any direct sunlight or extremes of temperature.

Avoid contact with paints, paint thinners or corrosive cleaning agents, which can weaken the shells of the hats and even eliminate electrical resistance.

Do not drill holes in the hard hat and avoid applying labels as it may reduce the integrity of the protection.

### Replacing Hard Hats

You should immediately replace a hard hat if there are any signs of cracking, perforation or deformity to any part of the hard hat.

You should immediately replace a hard hat if there is any indication of exposure to heat, chemicals, UV light or any signs of flaking and loss of surface gloss.

You should immediately replace a hard hat if it experiences any serious impact, even if it shows no visible signs of the impact.

You should periodically replace a hard hat after three years from the date of issue.

The hard hat must have a sticker on the inside of the shell that allows the date of issue to be recorded. The internal harness should be replaced every two years.

Whilst under the AS/NZS 1800:1998 standard there is no maximum shelf life date, manufacturers recommend hard hats should not be sold if they are older than five years. All hard hats must be stamped with their manufactured month and year.

This date is found stamped on the inside of the hard hat, usually on the peak.

## CHOOSING YOUR HARD HAT

### First consider the type of hard hat

Type 1 – usually for construction and general tradies

Type 2 – for workplaces with constant high temperatures like smelters and foundries

Type 3 – used in high heat environments like bushfires

### What about colour?

There are no hard and fast rules about hard hat colours, but there are some generally accepted norms

#### White

For Supervisors, Managers, Foremen, Engineers

#### Orange

Due to the high visibility, usually used in road construction and often for site visitors

#### Yellow

Mostly used for general construction, tradies and heavy machinery

#### Blue

Electricians and for those in technical advisory roles

#### Red

Fire Fighters and for those with Emergency and/or First-Aid training

#### Green

Safety Wardens and EHS Managers

#### Brown

Usually for welders and high temperature environments

#### Grey

Site visitors

#### Pink

Popular for female workers. Some companies issue pink hard hats to people who have forgotten theirs to discourage future forgetfulness!

#### Black

Often worn by managers and people who just like to be different

### Broadbrim or Standard Peak

Our unique, innovative Tuffgard Broadbrim design gives the wearer 300% more coverage than a standard peak hat. Extending protection from the elements, Broadbrim is the ideal choice for outdoor use.

### Harness Options

Poly-cradle harnesses provide a durable easy to adjust, low cost option.

Fabric webbed harness provides better airflow around the head for improved comfort.

Ratchet adjustable, fabric webbed harness provides better airflow around the head with easy, single handed adjustment. Adjustable harnesses (50 – 66cm) ensure a comfortable fit.

### Ventilation & Accessories

Vented hard hats are by far the most popular design. The vents are open slots moulded into the top of the hat. When working in high temperatures or outside during the day, you should consider a vented design to help prevent over-heating. For indoor and night work, non-vented are fine. In either style our terry-towelling, highly absorbent sweatbands can be also installed, along with many other accessories like a chin strap, lamp, face shield, reflective strips or earmuffs.

## AUSTRALIAN MADE & OWNED

**Genuine Australian designed, made and owned products.**

Here at Sureguard, safety never gets the day off! Our hard hats are meticulously produced and tested to meet the highest safety standards. Our Australian production team work with one thing in mind - the safety of all Australians. With your support we can continue to produce quality products for your protection at an affordable price. Support Australian Made. Tuffgard safety helmets are designed to meet the requirements of AS/NZS 1801 for shock absorption, penetration resistance, lateral stiffness, ignition by flame and electrical resistance

- Products Certified to comply with AS/NZS 1801:1997
- Our Quality Assurance ensures that every hard hat can be tracked back to the original batch of raw material if required
- Every product is inspected and individually packed for protection and to prevent any kind of damage
- All plastics used to manufacture our hard hats are recyclable

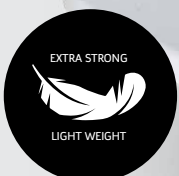

THE LIGHTEST HELMET ON THE AUSTRALIAN MARKET!

Vented or  
non vented  
options

Miners Helmet  
available metal  
or plastic brackets

logo printing  
available in  
8 locations.

## TUFFGARD FEATURES

- ABS helmets provide high impact resistance and are ideal for most applications where head protection is required.
- Polycarbonate helmets combine high impact resistance with the ability to withstand very high temperatures and are ideal for use in foundries and smelters.
- Non vented versions are suitable for most applications and use in areas where dust ingress to the upper head needs to be minimised.
- Vented versions are ideal for those working in warm climates where the venting enables improved airflow around the head thus improving comfort.

# PAD PRINTING

Sureguard's pad print division can provide pad printing and screen printing. We not only print on hard hats in up to eight locations and up to six colours, we can also pad print or screen print on all types of safety and promotional products. These include glove clips, safety specs, ear muffs, road cones, water coolers to name a few.

**SSA utilises "state of the art" pad printing technology capable of printing up to six colours. Helmets are designed with eight surface areas to accommodate corporate branding.**

## IMAGE SIZING

When planning your printing onto helmets, the following sizes are the maximum recommended sizes for images to be printed.

**1**  
**FRONT CENTRE**  
70mm (W) x 50mm (H)

**2**  
**BACK CENTRE**  
50mm (W) x 50mm (H)

**3**  
**SIDES**  
70mm (W) x 40mm (H)

**4**  
**FRONT OR BACK AT 45**  
40mm (W) x 40mm (H)

**CLEARVIEW IS THE NEW FUTURE OF HARD HATS**

# CLEARVIEW

## FULLY AUSTRALIAN OWNED

CLEARVIEW IS DESIGNED, DEVELOPED  
& MANUFACTURED IN AUSTRALIA.

This new CLEARVIEW range was designed so the wearer has a clear view looking through the helmet peak – allowing for safer working conditions and a much safer working environment

PRODUCT CERTIFICATION  
BSI CERTIFIED PRODUCT  
AS/NZS 1801:1997 LIC. BMP 740955

## WIDE RANGE OF OPTIONS AVAILABLE

Vented or  
non vented  
options

Miners Helmet  
available metal  
or plastic brackets

logo printing  
available in  
8 locations.

## CLEARVIEW FEATURES

- The CLEARVIEW caps are designed to be translucent with a see through peak. The see through peak allows the wearer to look upwards without the need to tilt the head back, causing discomfort in the neck over a prolonged period of time
- CLEARVIEW also stops the need for the wearer to reverse the head harness in the helmet which normally allows the wearer to have clearer vision while looking upwards
- The improved modern design of the attachment slot allows the CLEARVIEW helmet to accept most general 25mm and 30mm attachments that are in the marketplace (cap attachable earmuffs, visor holder, etc).
- Made from high impact Polycarbonate Extra strong and robust, yet light weight

Replacement  
options available  
for terylene, poly cradle  
and ratchet harness

## TUFFGARD WARDEN CAPS AND KITS (HELMET + HARD HAT HOLDER)

Warden kits have been designed specifically for the following Work Health and Safety roles:

**First aid  
officer**

**Deputy  
chief  
warden**

**Area  
Warden**

**Chief  
Warden**

**Warden**

The Helmet colours and titles are as per the Australian Standard, they have been placed in our Cap Grip holder for ease of storage and attachment to office equipment such as filing cabinets, metal stationary cupboards. They can also be affixed to timber and plaster board walls using the appropriate anchors. The helmets are also available individually without the Cap Grip holder.

- Contains high performance magnets for attaching to metal surfaces plus screws to attach to timber and plaster board surfaces
- Inbuilt safety glasses holder
- Suitable for most standard type hard hats
- UV Stabilised for outdoor use

### EASY AS 1, 2, 3

#### STEP: 1

Mount the Cap Grip to the storage area using the inbuilt magnets or supplied mounting screws.

#### STEP: 2

Holding the cap (peak pointing down), place the peak of the cap in to the bottom of the Cap Grip holder.

#### STEP: 3

Push the rear of the cap back until it clicks into place.

*The cap can be removed by pushing down on the locking clip and pulling the cap forward.*

# croc grip

## MULTI PURPOSE

THE SSA CROC GRIP IS A STRONG MULTI-PURPOSE CLIP THAT GIVES YOU AN EXTRA HAND WHEN YOU NEED IT.

The centre safety break device protects the user by breaking at an engineered pressure if the article which the Grip is attached to becomes jammed or snagged in machinery. This will minimise the potential for injury.

# MULTICAP

PATENT 2013100948

**FULLY AUSTRALIAN OWNED** MULTICAP IS DESIGNED, DEVELOPED AND MANUFACTURED ENTIRELY IN AUSTRALIA.

MULTICAP is a uniquely designed product. It is designed to fit over star pickets and allows fence wire to pass through the cap and star picket when in place

## FEATURES & BENEFITS

- MULTICAP is designed to fit on both 12mm and 20mm reo bar
- Once fitted to a star picket, MULTICAP is securely locked in place, ensuring it will be difficult to be removed by the elements
- MULTICAP is manufactured in a hi-vis orange colour as an added safety feature to stand out on building sites, work sites and rural areas
- MULTICAP has a unique securing system on star pickets and can be applied to star pickets by hand in most cases
- MULTICAP is manufactured from a strong co-polymer polypropylene
- MULTICAP is reinforced on the top and the base to give extra strength
- MULTICAP has a moulded impression of the star picket on top which allows for correct fit on star pickets
- MULTICAP is sold in bag quantity of 100, carton quantity of 400 (4 bags), pallet quantity of 8000 (20 boxes)
