SSA
SUREGUARD SAFETY AUSTRALIA

The new standard in general - purpose head protection.

The Maxisafe Fullbrim is proudly **Australian made** and built for tough, everyday use across a broad range of industries including mining, construction, transport, forestry and heavy engineering.

Designed to deliver **360° protection**, this advanced safety helmet features a full brim that shields the face, ears and neck from sun, glare, rain and falling debris. It offers up to **75% more coverage** than a standard hard hat — making it ideal for outdoor worksites where environmental hazards are constant.

Despite the wider coverage, the Fullbrim remains **lightweight, balanced and comfortable**, reducing fatigue over long shifts. It's also **lighter** than many traditional broad brim helmets, offering superior visibility and wearability without compromising on strength.

Features & Benefits

- + **360 deg full brim coverage** – providing increased protection from the elements and falling hazards
- + **Ratchet wheel adjustment** - one-handed fit adjustments for comfort
- + **Type 1 ABS material** - Strong yet lightweight
- + **Vented** – providing extra wearer comfort by allowing for air circulation, reducing head heat and sweat
